1. The Stalin Works is building a large underground gasoline storage depot about 200 meters from the railroad station in Cervene Pecly (050/M37) in the direction of Kolin. The tanks are about 15 meters underground and are being laid in a concrete basin filled with water. They will be covered by about 2½ meters of concrete and houses will be built over them. A railroad siding leads to the area. [redacted] the digging was nearly complete and ten large tanks were brought to the location. 50X4
